PROFILE SUMMARY

Flutter Developer with 1.7 years of hands-on experience in developing and maintaining cross-platform mobile applications using Flutter and Dart. Experienced in building scalable real-time service applications including Food Delivery, Grocery, Taxi Booking, and Parcel Management systems. Skilled in Clean Architecture, MVVM, and MVC pattern with Dependency Injection, Firebase Authentication, Firebase Analytics, Firebase Storage, Firebase Cloud Messaging (FCM), REST API integration, Razorpay payment gateway and Google Maps integration, GetX and Provider state management, Flutter animations, and Google Play Store / App Store deployment. Passionate about writing clean, reusable, and performance-optimized production-ready code, while collaborating effectively in team environments following SDLC best practices.

Skills

Programming Languages: Dart, JavaScript

Frameworks & Technologies: Flutter, Firebase, REST API Integration

Architecture & Design Patterns: MVVM, Clean Architecture, MVC, Dependency Injection, OOPs Concepts, Singleton, Lazy Initialization

State Management: GetX, Provider

Firebase Services: Authentication, Firebase Analytics, Firebase Storage, Firebase Cloud Messaging (FCM) and Firebase Hosting

Integrations: Razorpay Payment Gateway, Google Maps Integration

Tools & Platforms: GitHub, VS Code, Android Studio, Flutter DevTools

Core Skills: SDLC, Responsive UI Development, Flutter Animations, Reusable Component Development, Flutter Unit Testing, Manual Testing, App Performance Optimization, Play Store & App Store Deployment

Experience

Flutter Developer

Nov 2025 – Present

Feb40

- Contributed to the end-to-end development of a multi-service Flutter application integrating Food Delivery, Grocery, Taxi Booking, and Parcel Management systems within a cross-platform environment, following MVVM and Clean Architecture principles with Dependency Injection for scalability and maintainability.
- Implemented Firebase Authentication and Firebase Cloud Messaging (FCM) for real-time data handling and notifications, and integrated Firebase Analytics and Firebase Storage for tracking and media management, while optimizing data queries to increase overall app performance.
- Integrated Razorpay payment gateway for secure in-app transactions and Google Maps for real-time location tracking across taxi and delivery workflows.
- Developed responsive, reusable UI components with Flutter animations, wrote unit tests to ensure code reliability, used Flutter DevTools for performance profiling alongside conducting manual testing and managing deployment on the Google Play Store and App Store.

Associate Software Engineer

Jan 2025 – Oct 2025

Success Life Mantra

- Developed frontend modules for a Social Media Marketing Tool using Flutter and React.js with CRM functionality, broadcast messaging, and subscription-based workflows, following SDLC processes across planning,

development, and testing.

- Implemented dynamic UI flows, user role-based access, and scalable, reusable feature modules using OOPs principles to improve usability, maintainability, and app performance.

Flutter Developer Intern

Jul 2024 – Dec 2024

Mindvision technologies

- Built responsive Flutter UI components and integrated REST APIs for real-time web and mobile applications during internship training.
- Collaborated with the development team to improve application functionality and user experience.

Projects

Photography Studio Event Management Application — Freelance Project

- Developed a Flutter-based Photography Studio Event Management application for managing customer bookings, event details, photo selections, and delivery workflows using MVVM architecture.
- Built separate Admin and User modules with responsive UI, Firebase integration, reusable widgets, and real-time data management.
- Implemented Authentication, booking management, and event status tracking, with optimized data handling that improved overall app performance.

Multi-Service Mobile Application (Taxi, Parcel, Restaurants and Grocery Service)

- Contributed to the development of a multi-service mobile application integrating Restaurant Ordering, Grocery/Store Delivery, Parcel Delivery, and Taxi Booking within a single Flutter APK, built on Provider-based state management with Dependency Injection.
- Integrated Firebase Authentication and Firestore database for users, vendors, drivers, orders, and ride management, with query optimization that boosted app performance.
- Integrated Razorpay for in-app payments and Google Maps for live tracking of taxi rides and deliveries.
- Ensured smooth UI performance, responsive layouts, added Flutter animations, and conducted unit and manual testing to maintain application stability.

Social Media Marketing Tool

- Developed a Social Media Marketing Tool using React.js, Flutter, and Dart with features like CRM (Customer Relationship Management), Keyword based flows, broadcast messaging, and plan-based restriction.
- Implemented dynamic UI restriction, campaign management, and reusable, role-based access components for scalable marketing operations.

Education

Sethu Institute of Technology

Sept 2020 – Mar 2024

B.E in Electronics and Communication Engineering

- CGPA: 8.6/10.0

V.H.N Boys Higher Secondary School

Jun 2018 – Mar 2020

Higher Secondary Certificate, Computer Science

- Percentage: 68/100
